Significant Activity for the month of June and July, 2026

Training programme on production technologies of groundnut and supply of inputs

KVK has organised One day training programme on Production technologies of Groundnut and supplied Visishta variety of groundnut for 50 farmers of Padirikuppam village of Karvetinagar mandal on 23.06.2026. As a part the programme farmers were enlightened about the Integrated Crop Management practices in Oil seeds crops especially in groundnut, Balanced fertilizer application as per soil test result, effect of El Nino on agriculture and allied sectors and preparedness towards El Nino, Integrated Pest Management, Integrated Farming Systems, Farm Mechanization and Value addition of Agro produce etc.

Dr.S. Sreenivasulu, Senior Scientist and Head, RASS-KVK has explained about Good Agriculture Practices to be followed in Groundnut for higher yield and returns. He said that the Visishta variety of groundnut is having yield potential of 18-20 quintals per acre with 105 days crop period. He also explained about Importance of Balanced fertilizer application and soil testing for sustainable agriculture.

Dr.B. Santosh, Scientist, Crop Physiology, RARS, Tirupati has explained about Physiological characteristics of supplied groundnut variety, various nutrient disorders in groundnut and their management practices.

Dr.V. Divya, SMS, Agronomy has explained about Integrated Crop Management practices in groundnut, intercultural operations to be done in groundnut, Effect of El Nino on agriculture and allied sectors and their mitigation practices etc.

Dr.S. Sreenivasulu, Senior Scientist and Head, RASS-KVK, Dr.B. Santosh, Scientist, RARS, Tirupati, Scientists of KVK Dr.V. Divya, P.S. Sudhakar, T. Ramu Kumar, Dr.D. Anusha and 50 farmers were participated in the programme.
